app.js :

```
const express = require("express");
const app = express();

const userRoutes = require("./routes/userRouter");
const cartRoutes = require("./routes/cartRouter");

app.use(express.json());

// Mount routes
app.use("/user", userRoutes);
app.use("/cart", cartRoutes);

app.listen(4003, () => {
    console.log("Server running on http://localhost:4003");
});
```

userRouter.js :

```
const express = require("express");
const router = express.Router();

router.get("/login", (req, res) => {
    res.send("<h1>User Login Page</h1>");
});

router.get("/profile", (req, res) => {
    res.send("<h1>User Profile Page</h1>");
});

module.exports = router;
```

cartRouter.js:

```
const express = require("express");
const router = express.Router();

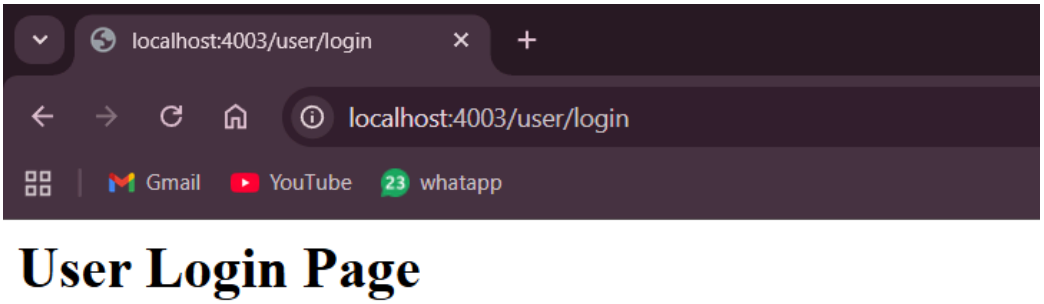
router.get("/item", (req, res) => {
    res.send("<h1>Cart Item Page</h1>");
});

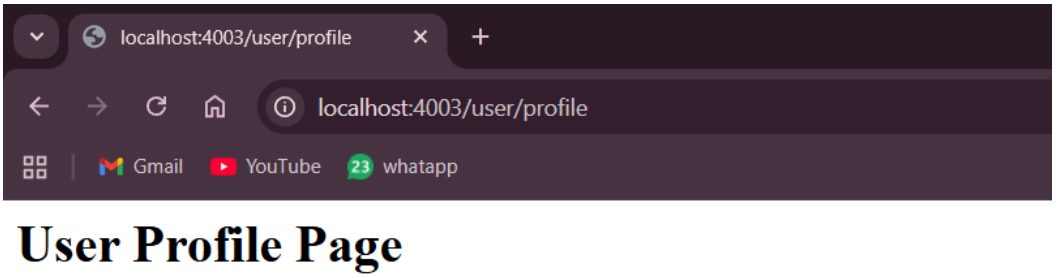
router.get("/list", (req, res) => {
    res.send("<h1>Cart List Page</h1>");
```

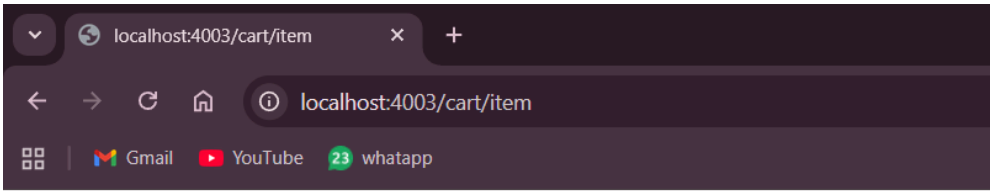
```
});

module.exports = router;
```

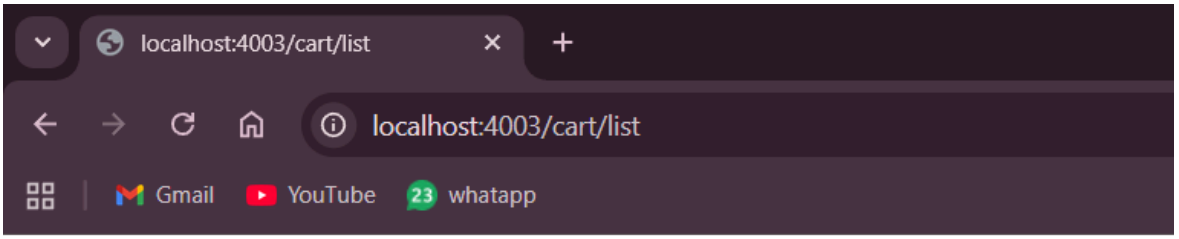
OUTPUT:







Cart Item Page



Cart List Page
